Winter Semester 2025-26 <15 Times New Roman> <Centered>

Abstract <14 Times New Roman>

1. Motivation, aim and objective of the project. <12 Times New Roman>
2. About Methodology.
3. Highlight Novelty.
3. Outcome along with metrics.
4. Efficiency Attained.

Keywords (A maximum of 6 Keywords.) <12 Times New Roman> <Italics>

Introduction <14 Times New Roman>

1. Introduce and present the overall idea of the project. <12 Times New Roman>
2. Background of the project.
3. Talk about the statistics related to the methods used.
4. Advantages and disadvantages of the various methods as well as the projects.

Literature Survey / Related Works <14 Times New Roman>

1. A minimum of 25 relevant research articles should be included. <12 Times New Roman>
2. Refer the articles and write a paragraph (3 sentences).
3. The respective paragraph should be cited.
4. Comparative analysis of the different articles used in tabular form.
5. Consolidation of all the methods referred with all the metrics in tabular form
6. Explanation/Interpretation of the tabulation

Dataset Used <14 Times New Roman>

1. Details/Description of the dataset used. <12 Times New Roman>
2. Training / Testing / Validation
3. Links/URLs to the datasets used in the project

Overall Architecture <14 Times New Roman>

1. The overall architecture of the project has to be represented. <12 Times New Roman>
2. The flow of the architecture has to be explained in detailed. .
3. Each and every blocks in the architecture has to be explained in detail.

Proposed Methodology <14 Times New Roman>

1. Detailed explanation of the methods used with diagrammatic representation. <12 Times New Roman>
2. Proposed Methods in terms of Algorithms/Pseudocodes
3. Advantages and disadvantages of the methods used.
4. Justification on why you have chosen this particular method.

Implementation Details / Challenges in Implementation

1. Hardware / Software <12 Times New Roman>
2. Intricacies involved in implementing the project
3. Any other

Results <14 Times New Roman>

1. Results obtained (Output | Graphs | Charts) <12 Times New Roman>
2. Interpretation of the obtained results.

Analysis <14 Times New Roman>

1. Analysis of the results obtained. <12 Times New Roman>
2. Comparison of the obtained results with the already existing results.
3. Efficiency obtained should be included along with the metrics (**Accuracy** | **Precision** | **Recall** | **F1 Score** | **Confusion Matrix** | **ROC-AUC** | **MAE** | **RMSE**...) used.
3. Results should be represented in graphs along with its interpretation.

Conclusion and Future Work <14 Times New Roman>

1. Significance of the project. <12 Times New Roman>
2. Results and Efficiency obtained.
3. Difficulties faced in performing this projects.
4. What could be done in the future? (Can it be improvised or not?)

Prompt Engineering <14 Times New Roman>

1. Prompt Source <12 Times New Roman>
2. List out all the prompts utilized. <12 Times New Roman>
3. List out all the relevant search keywords. <12 Times New Roman>
4. Any other <12 Times New Roman>

References <APA Format> <14 Times New Roman>

1. Journals <12 Times New Roman>
2. Conferences
3. Book Chapters | Websites <Hypertext link of the very single page>

Appendix

Work done by each and every individual student.

Student Name 1:

Student Name 2:

Student Name 3:

Project Code

1. Provide the **Complete Project code** Link/URL.
